

PEDIATRICIANS

Midwifery care includes your baby's pediatric care for the first three weeks of life. As long as everything is low-risk and normal for your baby, we will offer you both newborn metabolic screens, critical congenital heart defect screen, hearing screen, weight checks, breastfeeding checks, and jaundice checks for the first three weeks. It is recommended that you schedule your first pediatrician visit when they are 1-2 months old.

Questions for parents to consider asking when seeking a pediatrician:

Naturopath or medical doctor?

Opinion on vaccinations?

Opinion on circumcision?

In addition to those common questions, here is a helpful sheet:
